Pargas
Parainen

Noun. Island.
Expression. Sound.
Wonder. *Awe.*

More than a letter.
More than a word.

It's the sound you make trying to
decide between one of the 10 000
islands that make up the archipelago.

It's the expression on your face
when you discover all the natural
beauty the place has to offer.

An irresistible balance of
tradition and modernity.

Creativity

Pargas is a city of ideas, dreamers,
and forward-thinkers.

Providing the space for residents
to explore and discover.

Flexibility

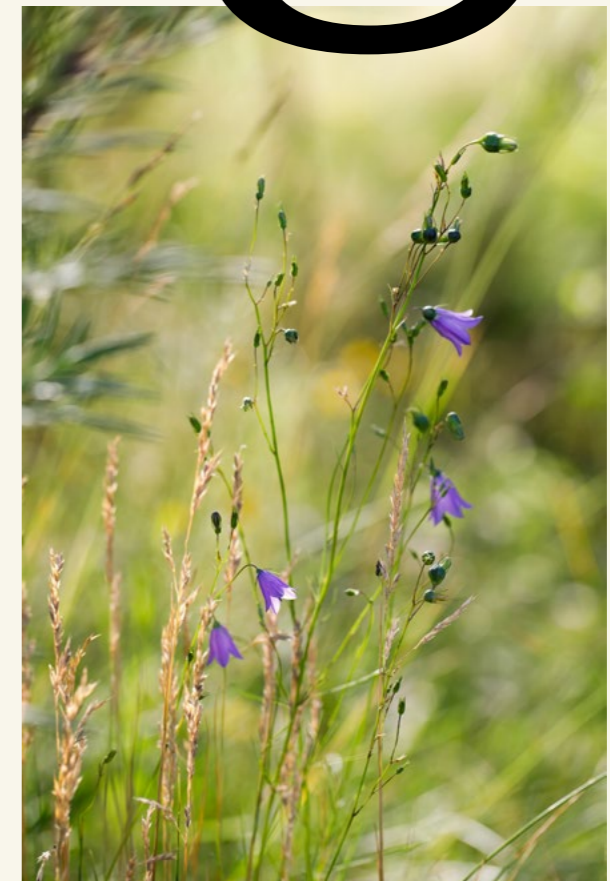

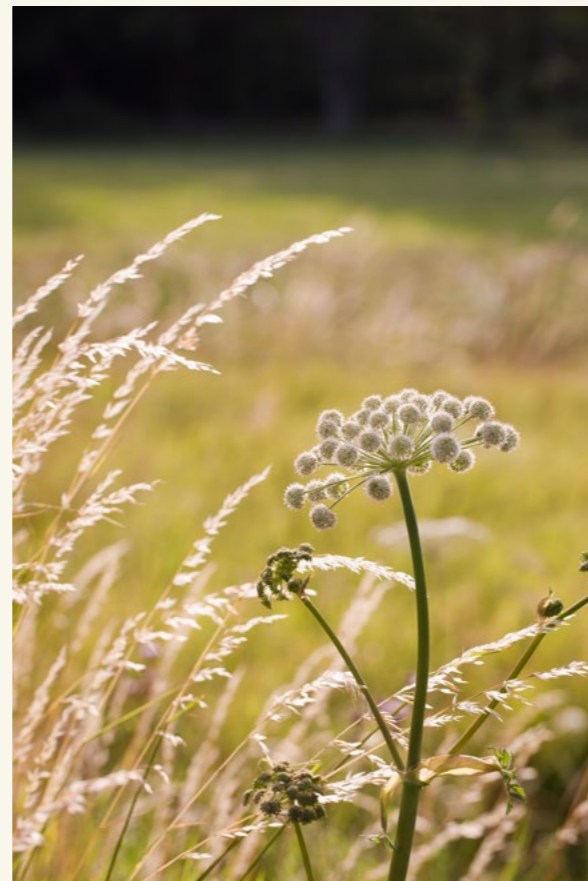

Slow-living and flexibility are at the heart of life on the archipelago.

Time moves at its own pace here and that's just the way we like it.

Wellbeing

We know that the health of the community is central to the health of the individual.

From the sea air to the saunas, Ö is a lifestyle that holds health and mindfulness at its core.

Sun

Noun. That which awakens us.

The sun represents everything living in Pargas.

Watching it rise and set over our waters is
an experience that never fails to inspire,
connect, and awaken our residents.

Food

Noun. That which sustains us.

Food is what brings us together.

From our fresh fish to our summer berries, Pargas is the home of a rich culture of locally sourced culinary experiences.

Sea

Noun. That which surrounds us.

The sea is at the very heart of our archipelago lifestyle.

Its sounds, sights, and smells are the very core of us.

Stone

Noun. That which shapes us.

The cliffs are what give our
islands definition.

They're our learning grounds
for play, adventure, and life itself.

Debris

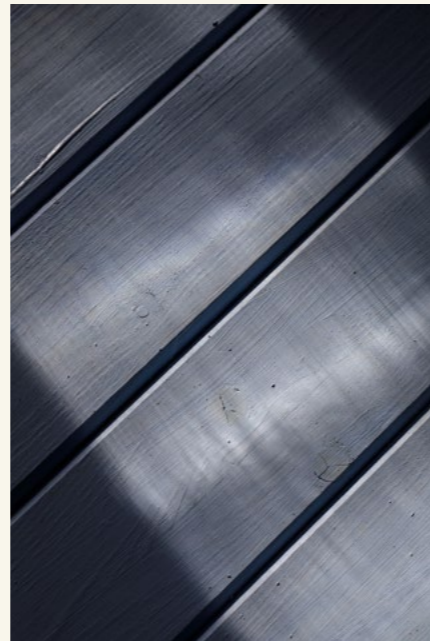

Noun. That which finds us.

The wood and artefacts that wash ashore on the cliffs and beaches of Pargas are a testament to our lasting relationship with the sea.

Their sight and textures have become a staple of beach-side hikes for locals and tourists alike.

Textures

Exploring the surfaces that make up
our culture.

From the chipped paint of sea-worn
homes to the rough grain of ancient cliffs.

Architecture

The walls of our vibrant town are rich with history.

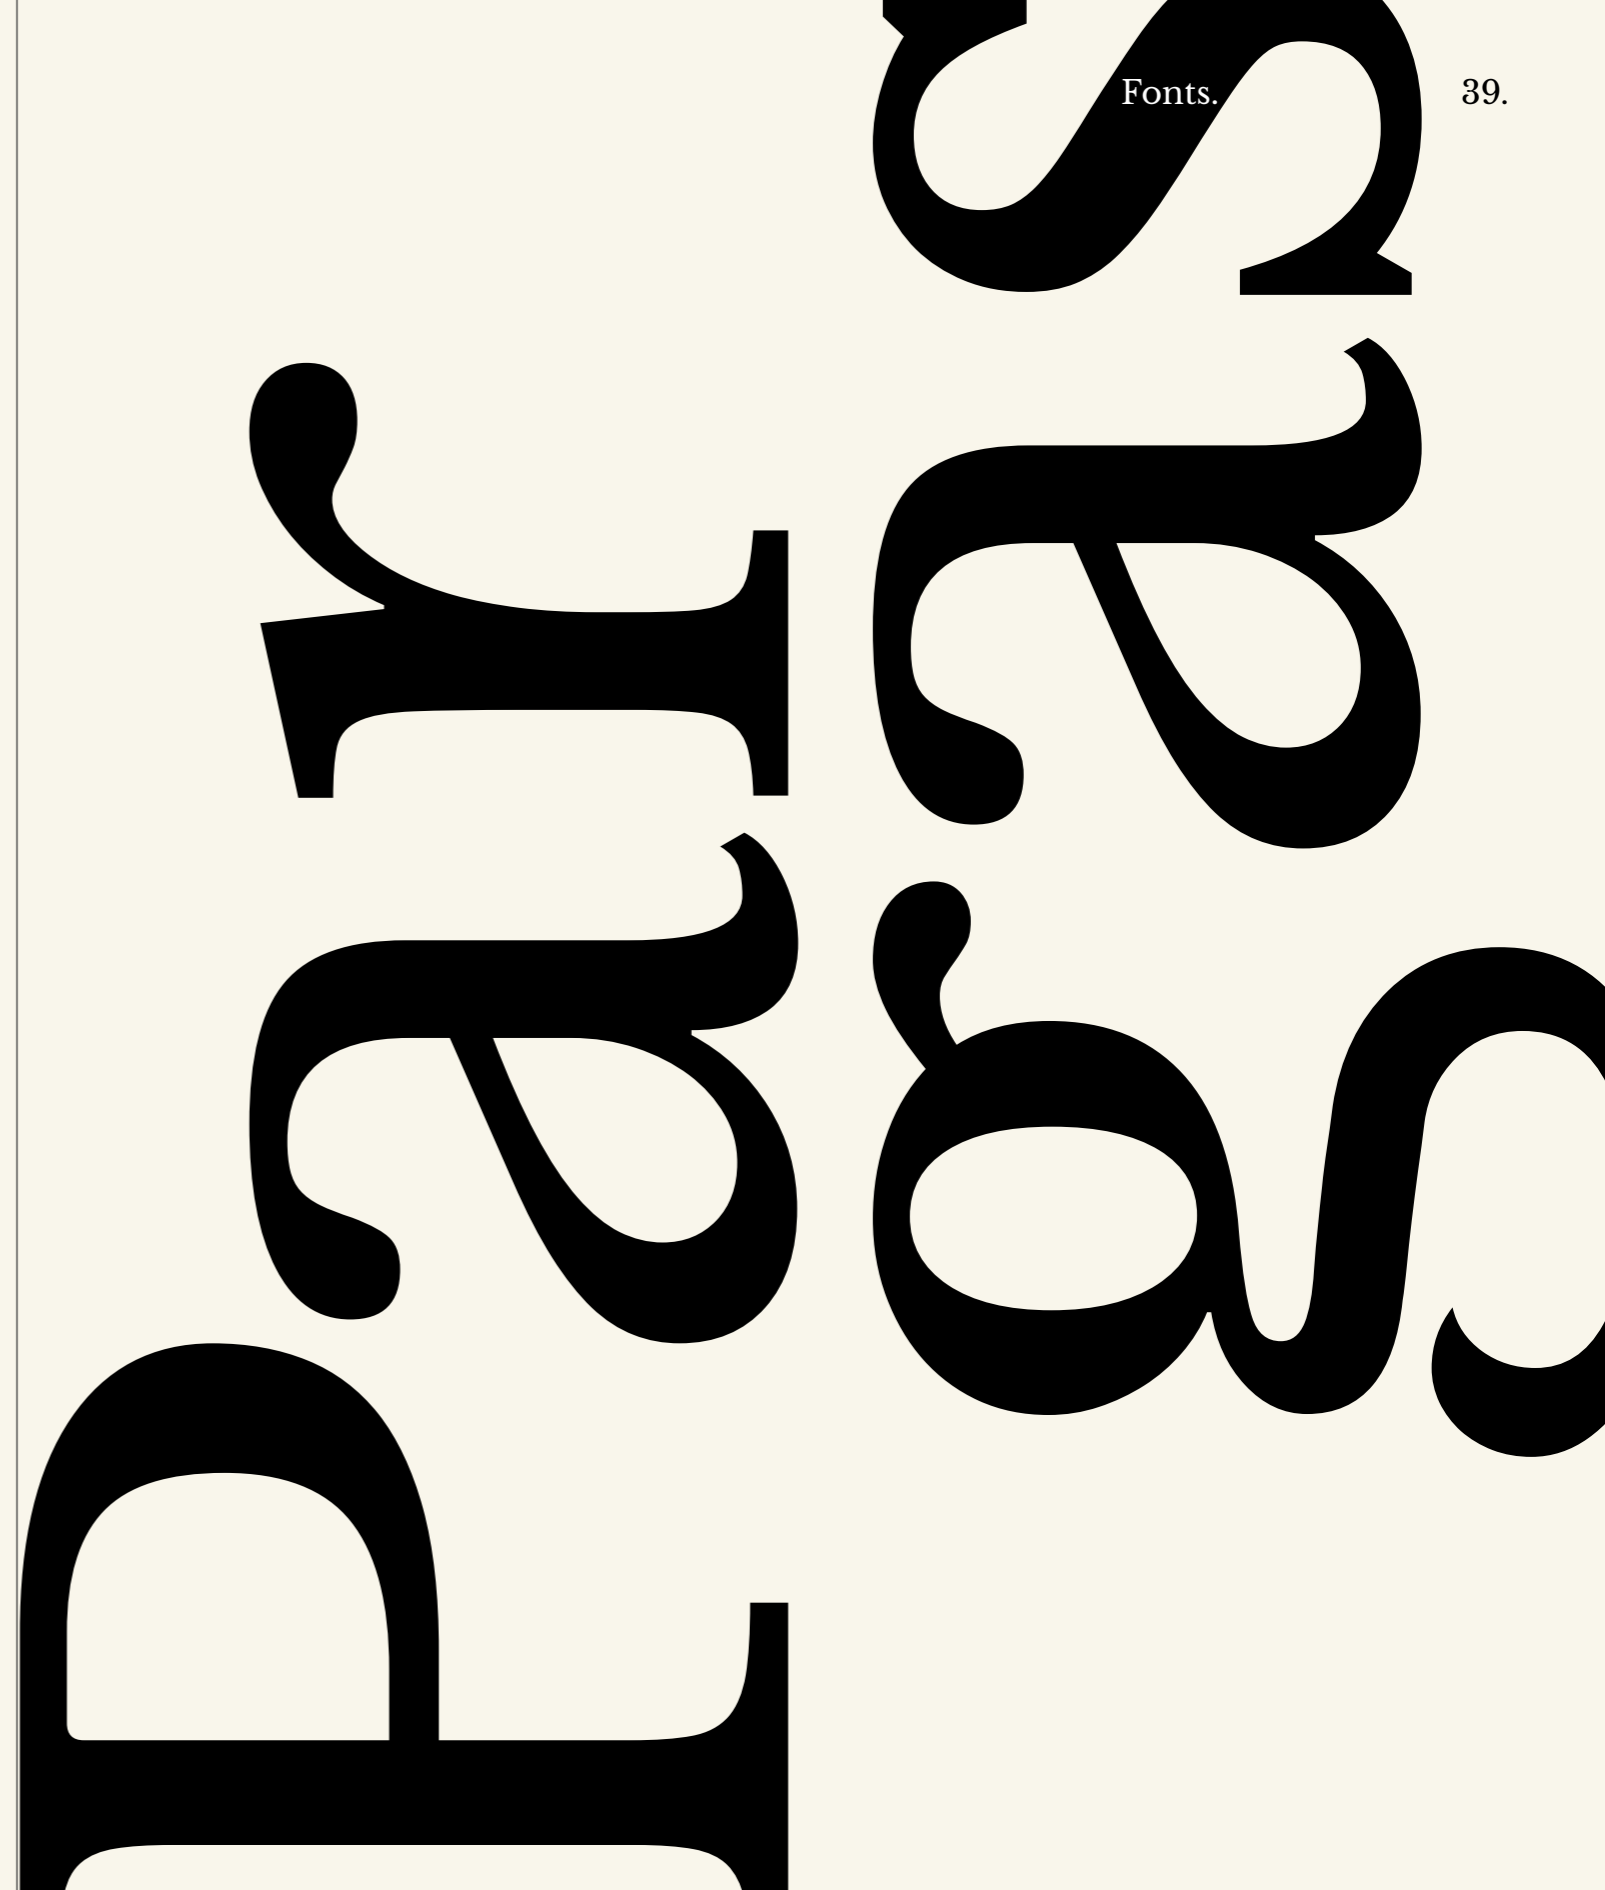

A showcase of our evolution through the years.
